

**START
1973**

Foundation of Spinder Dairy Housing Concepts

What began as a metal workshop soon became a factory and developed into a leading manufacturing company with a complete range of products for the modern dairy farm.

1977 Eating becomes dining

The first self-closing feed fence with bottom locking mechanism. Comfort for farmer and cow.

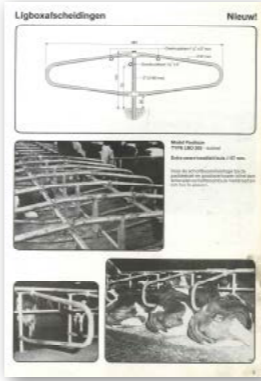

1981 First printed catalogue

The first printed product catalogue from Spinder was published in 1981.

1983 Free-standing freestall divider

Spinder presents the free-standing freestall divider. A new freestall divider with clamps that are mounted to a support post at the front of the cubicle.

1991 Purchase of a fully automatic bending machine

The number of free-standing freestall dividers increases. Spinder takes a fully automatic bending machine into operation.

1993 Spinder safety feed fence

The safety feed fence offers more comfort and safety for the cow, and even more ease of use for the farmer.

1997 Alanta Waterbed

Spinder presents the Alanta waterbed for cows.

Spinder supplies nine dairy farms with waterbeds in 1997

2000 Meadow mattress

Comfort from the pasture, in the barn; the rubber mat is replaced by a mattress with a rubber topcover.

2022 Fitbox

Animal-friendly, flexible and durable. Spinder's flexible Fitbox takes cow comfort to a new level. The first Spinder cubicle made of fiberglass, instead of iron.

2022 Webshop

Spinder launches online sales of barn equipment for dairy farmers. 24/7 ordering convenience. www.spindershop.com

2020 Relocation

Spinder relocates from Harkema to a new factory building in Drachten

2017 Acquisition of BUC; start of sales of Dual waterbeds.

Dual Waterbeds provide additional knee comfort for the cow and are the ideal solution for both the cow and the dairy farmer: optimal cow comfort, savings in labor and bedding, and thus low annual costs.

2016 Cuddlebox

At EuroTier 2016, Spinder wins the Innovation Award with the Cuddlebox. The Cuddlebox provides optimal conditions during calving for cow, calf and farmer.

2010 Introduction waved neckbar

Replacing the straight neckbar with a waved neck bar gives the cow more space when lying down and standing up and has a guiding effect on the cow. More comfort for the cow and cleaner stalls for the farmer.

2009 Purchase of a laser tube cutting machine

The complexity of the product and the flexibility desired by the customer increases. Spinder invests in a fully automatic laser tube cutting machine

2005 Rope pulled manure scraper

Spinder introduces PE rope as a cow-friendly (and farmer-friendly) alternative to chain or steel cable for pulling the manure scraper.
