Drinking trough models 150, 200 and 300

Cows are herd animals. They like standing together at a long drinking trough. A drinking trough is most suitable for providing many cows with clean drinking water in a short period of time. Cleaning these long drinking troughs is also a very easy task. After removal of the stopper, the dirt is automatically discharged into the pit. Model 150 (150 cm long) has a capacity of about 100 litres and offers sufficient drinking facilities for approx. 15 cows. Model 200 (200 cm long) has the same characteristics as model 150, but has a reservoir of 130 litres and offers therefore sufficient drinking facilities for approx. 20 cows. Model 300 (300 cm long) has a capacity of about 200 litres and offers sufficient drinking facilities for approx. 30 cows.

	Model 150	Model 200	Model 300
Dimensions:	28 x 150 cm	28 x 200 cm	28 x 300 cm
Capacity:	ca. 100 liter	ca. 133 liter	ca. 200 liter
Attachment:	floor or wall attachment		
Drinking height:	80 cm (top of the drinking trough)		

Important features:

- Made from stainless steel and fully stained;
- Outward-turned edges, no caking of dirt;
- Easy to clean, thanks to a smooth and funnel-shaped finish;
- Easily removable stop.

Accessories:

- Suevia float, capacity max. 40 litres/min.;
- Fastening items for wall or floor mounting.

Optional:

- A protection bracket if the drinking trough is placed against a (concrete) wall.
